

# AeroTec™ Fans

## More Than Just a Truck Fan – It’s an Air Replacement System

### Cools Trailer Quickly, Safely and Effectively

AeroTec™ creates a high-velocity column of air that circulates through the entire length of the trailer. Whether your application is cooling the loading dock trailer or removing stale air from an export crate, AeroTec™ really moves air.

AeroTec™ continually pulls new air in and pushes old air out, unlike ordinary truck fans that only pressurize the air in the trailer, which does not allow for adequate air exchange.

### Reduces Maintenance Costs and Requirements

AeroTec™ takes up to 75% less space, making it less prone to accidental collisions than ordinary truck fans that have their entire fan assembly positioned in the door opening.

AeroTec’s breakaway elbow design eliminates costly fan replacement. Unlike other truck fans that are mounted on a stiff arm support, AeroTec’s elbow can be reattached in a snap if accidentally hit and knocked off, reducing costly repair or replacement.

### Easier and Quieter for employees to Operate

AeroTec’s mechanical components are mounted beyond the heavy traffic area of the door opening making it safer and quieter to operate, thus reducing noise levels and ensuring that moving parts are out of harms way.

#### MODEL 700 SPECIFICATIONS

1/3 HP, split capacitor motor with thermal cut out to prevent overheating

240V

UL Approved

#### MODEL 750 SPECIFICATIONS

1/2 HP, split capacitor motor with thermal cut out to prevent overheating

240V

UL Approved
