

Safetech Ultra Dock Shelter - S-2200

The **Safetech Ultra Dock Shelter** creates a tight seal between the building wall and the back of the truck. It effectively keeps the outside elements out of the warehouse, providing energy savings and added comfort for your employees. The compressible foam side frame prevents damage from off-centered trailers.

A raked translucent head frame protects the dock area from weather elements while allowing natural light to enter the dock area.

Overlapping layers of fabric provide more resistance against the sharp corners of the trailer, extending the life of the shelter.

Roll-formed galvanised steel framing (5-year limited warranty).

Flexible fiberglass stays ensure that head and side curtain pressure is maintained on the truck body while compressible neoprene cords conform to the vehicle's irregular perimeter.

Side curtains can be pinned back for additional summer protection

Unit Width:	3660mm
Unit Height:	3505mm
Unit Projection:	610mm
Clear Opening Width:	2285mm
Clear Opening Height:	2590mm
