

Vehicle Lifts

Architecturally sensitive design, Australian manufactured

The Best Way to Drive Down-Under

Why Choose Safetech

Australia's widest range of vehicle lifts.

For more than 30 years Safetech has been lifting Australian business with our award-winning range of lifting products and solutions.

From large 30 tonne truck lifts in shopping centres to custom car lifts that complement your home and your lifestyle. We make them all.

Our Vehicle Lifts are built with the same engineering excellence and tradesman's care that is trusted by many Australian retailers, factories and warehouses.

Lifts that work for you, not the other way around

Many Vehicle Lifts are industrial relics. Safetech lifts are simple intuitive and modern.

Riding one of our lifts requires the same skill as any commercial or residential personnel lift.

One touch/no touch controls schemes and automatic sensing.

Creating Value

Lifting your investment

For many people, a house or apartment is their most valuable investment and access to secure, reliable parking is essential for many buyers.

Safetech are Australia's most trusted supplier of lifting solutions with national 24/7 support.

Lift your profile

For builders and owners the quality and finish of a building and its utilities add value and prestige.

Safetech offers a variety of standard and bespoke features and surface treatment to enhance appearance and function.

Safety & Security

Lifts that keep you safe

Security and safety are at the core of any Safetech design.

Passengers feel secure in the well lit Safetech cabin. Refined controls provide instant feedback on the lifts progress.

-  **Non-powered descent**
-  **Onboard phone support**
-  **Control panel feedback during travel**
-  **Optional landing lock pins**
-  **Warning lights and alarms**
-  **Manual override controls to prevent intruders**

Park Assist

The Safetech Park Assist system provides intuitive feedback about the position of your vehicle.

Various integrated mounting options are available upon request.

Buyers Guide To Car lift Selection

Making the right decision

Choosing a vehicle lift is one of the most important decisions you will make for your building. The lift should be easy to use, reliable, efficient, safe and add value to the property.

Standardised Australian Design

- Is the car lift locally manufactured and supported?
- Does it comply with Australian mechanical, electrical, hydraulic and controls standards?

A Single Trusted Supplier

- Does the manufacturer make the lift, doors and controls?
- Who do you call? Managing multiple suppliers reduces accountability.

Safety & Security

- Is the lift WorkSafe compliant?
- Can you safely exit in a power outage?
- Any risk of entrapment?
- Can strangers use it to enter the building?

Performance & Reliability

- Check the suppliers history. Ask other customers for a reference.
- Does the lift run smoothly?
- What is the lift cycle time?
 - Including door opening/closing?

Quality Finishes

- Does the lift design match the finish of your building?

User Experience

- Are the controls modern and attractive?
- Is it easy to use?
- Can you stay in your car?

Support & Service

- Is 24/7 local support available?
- Are design and controls engineers in Australia or overseas?
- Are parts available locally?

Configurations

A lift for every space

AutoMate

Our refined vehicle lift package has been designed with existing industry specifications in mind, combined with Safetech's proven quality lifting components.

Dual Rail

Our Dual Rail system provides all the benefits of the AutoMate, with higher capacity and versatility.

Scissor Lift

Scissor options in general allow for minimum shaft width, maximising floor space for the rest of the building. This option requires a pit to house the legs when lowered.

Double Scissor

Double scissors allow for longer travel, but a deeper pit is required.

Roll Over Roof

The Space Saver

Park or Play: One up, One down

Safetech roll-over Car Lifts provide extra car parking space on the roof of the lift.

When closed two cars can be accommodated. One on the roof and a second parked below on the lift or driving through to a basement garage.

Vehicle Presence Sensors

Our unique sensor array protects the user by preventing the lift from rising when objects or people are on the car roof.

Longer Travel

Affordable longer travel is made possible by Safetech's custom roof design.

Our modular roof can be separated from the lift during descent, making access to deeper basement levels possible.

Locking pins ensure that loads remain safe and secure on the upper level.

Control - Residential System

Controller: Safetech Designed Control Access

	Vehicle Access	Pedestrian Access
Ground Level	2 BUTTON ELSEMA REMOTE	No controls as standard.
Onboard	For all vehicle based travel. Including opening doors.	 KEYPAD & RFID READER To enable controls.
Other Levels		 CALL BUTTON Where security is not an issue inside the building.

Options

4 BUTTON ELSEMA REMOTE
To separate door and lift with raise/lower control.

GROUND LEVEL KEYPAD & RFID
For pedestrian access

Controls can be set up to have the hoist waiting at ground level. So as you approach home simply press the up control and drive in like any other garage.

Close the door behind you and proceed to your basement or mezzanine level without the need to reach outside of your vehicle.

Control - Multi User System

Controller: Industry Standard Access Controller

	Vehicle Access	Pedestrian Access
Ground Level	<div>RFID 4 BUTTON REMOTE For destination input.</div>	<div>KEYPAD & RFID READER To enable landing control panel.</div>
Onboard	<div>No input required. Destination is pre-programmed.</div>	<div>KEYPAD & RFID READER To enable onboard control panel.</div>
Other Levels	<div>PHOTOELECTRIC SENSOR For automatic return to ground.</div>	<div>CALL BUTTON Where security is not an issue inside the building.</div>

Drivers simply press their destination level, wait for the door to open and proceed onto the platform.

The onboard controls will illuminate to confirm its destination and the occupied lift will automatically proceed to the level and open the level door.

Safetech Multi User controls are web based and provide building administrators with control over access, default levels and help improve cycle times.

Options

RFID TAGS/FOBS

For pedestrian travel. Enables use of onboard controls

Finishes

Lifts that match your style

Vehicle lifts may be hidden from the street but that doesn't mean they should be dark and industrial.

Users shouldn't feel like they are riding in a rubbish chute when they arrive home.

Safetech offers you quality finishes and custom touches.

Non Slip Paint
Matte finish enamel paint in our standard colours

Grid Mesh
Low maintenance and durable. Available on scissor lift variants

Chequerplate
Standard treatment in our standard colours

Sand Grit Enamel
For a non-slip gloss finish
