

Self-Storage Lift

The Self-Storage Lift designed for the Self-Storage industry.

Retain more rental space with a lift that fits in standardised self storage grids and layouts.

Safetech freight lifts provide an efficient, cost effective and safe method of transporting goods between floors.

Suited to large storage franchise's and owner operators, our Self-Storage Lift provides a user experience that is hassle free, reliable and high quality.

Advantages of the low-profile lift include:

- Simple to use intuitive lift style controls
- Smoother and quieter ride experience
- Built to all applicable standards AS1735.12 for Goods Lifts.
- Locally designed and built to suit the Australian Self Storage industry.
- Specification through to commissioning and after sales support is fully supported and delivered efficiently.

Our team are available with expert advice and assistance to get your facility to the next level. Contact us on 1800 674 566 or email sales@safetech.com.au

User-friendly lift controls

Made in Australia
