

# Vehicle Lifts

Architecturally sensitive design, Australian manufactured

**The Best Way to Drive Down-Under**

# Why Choose Safetech

## Australia's widest range of vehicle lifts.

For more than 30 years Safetech has been lifting Australian business with our award-winning range of lifting products and solutions.

From large 30 tonne truck lifts in shopping centres to custom car lifts that complement your home and your lifestyle. We make them all.

Our Vehicle Lifts are built with the same engineering excellence and tradesman's care that is trusted by many Australian retailers, factories and warehouses.

## Lifts that work for you, not the other way around

Many Vehicle Lifts are industrial relics. Safetech lifts are simple intuitive and modern.

Riding one of our lifts requires the same skill as any commercial or residential personnel lift.

One touch/no touch controls schemes and automatic sensing.

# Creating Value

## Lifting your investment

For many people, a house or apartment is their most valuable investment and access to secure, reliable parking is essential for many buyers.

Safetech are Australia's most trusted supplier of lifting solutions with national 24/7 support.

## Lift your profile

For builders and owners the quality and finish of a building and its utilities add value and prestige.

Safetech offers a variety of standard and bespoke features and surface treatment to enhance appearance and function.

# Safety & Security

## Lifts that keep you safe

Security and safety are at the core of any Safetech design.

Passengers feel secure in the well lit Safetech cabin. Refined controls provide instant feedback on the lifts progress.

- ❖ Non-powered descent
- ❖ Onboard phone support
- ❖ Control panel feedback during travel
- ❖ Optional landing lock pins
- ❖ Warning lights and alarms
- ❖ Manual override controls to prevent intruders

## Park Assist

The Safetech Park Assist system provides intuitive feedback about the position of your vehicle.

Various integrated mounting options are available upon request.

# Buyers Guide To Car lift Selection

## Making the right decision

Choosing a vehicle lift is one of the most important decisions you will make for your building. The lift should be easy to use, reliable, efficient, safe and add value to the property.

### Standardised Australian Design

- Is the car lift locally manufactured and supported?
- Does it comply with Australian mechanical, electrical, hydraulic and controls standards?

### A Single Trusted Supplier

- Does the manufacturer make the lift, doors and controls?
- Who do you call? Managing multiple suppliers reduces accountability.

### Safety & Security

- Is the lift WorkSafe compliant?
- Can you safely exit in a power outage?
- Any risk of entrapment?
- Can strangers use it to enter the building?

### Performance & Reliability

- Check the suppliers history. Ask other customers for a reference.
- Does the lift run smoothly?
- What is the lift cycle time?
  - Including door opening/closing?

### Quality Finishes

- Does the lift design match the finish of your building?

### User Experience

- Are the controls modern and attractive?
- Is it easy to use?
- Can you stay in your car?

### Support & Service

- Is 24/7 local support available?
- Are design and controls engineers in Australia or overseas?
- Are parts available locally?

# Configurations

## A lift for every space

### AutoMate

Our refined vehicle lift package has been designed with existing industry specifications in mind, combined with Safetech's proven quality lifting components.

### Dual Rail

Our Dual Rail system provides all the benefits of the AutoMate, with higher capacity and versatility.

### Scissor Lift

Scissor options in general allow for minimum shaft width, maximising floor space for the rest of the building. This option requires a pit to house the legs when lowered.

### Double Scissor

Double scissors allow for longer travel, but a deeper pit is required.

# Roll Over Roof

## The Space Saver

### Park or Play: One up, One down

Safetech roll-over Car Lifts provide extra car parking space on the roof of the lift.

When closed two cars can be accommodated. One on the roof and a second parked below on the lift or driving through to a basement garage.

**Vehicle Presence Sensors**

Our unique sensor array protects the user by preventing the lift from rising when objects or people are on the car roof.

## Longer Travel

Affordable longer travel is made possible by Safetech's custom roof design.

Our modular roof can be separated from the lift during descent, making access to deeper basement levels possible.

Locking pins ensure that loads remain safe and secure on the upper level.

# Control - Residential System

Controller: Safetech Designed Control Access

	Vehicle Access	Pedestrian Access
<b>Ground Level</b>	<b>2 BUTTON ELSEMA REMOTE</b>	No controls as standard.
<b>Onboard</b>	For all vehicle based travel. Including opening doors.	<b>KEYPAD &amp; RFID READER</b> To enable controls.
<b>Other Levels</b>		<b>CALL BUTTON</b> Where security is not an issue inside the building.

## Options

### 4 BUTTON ELSEMA REMOTE

To separate door and lift with raise/lower control.

### GROUND LEVEL KEYPAD & RFID

For pedestrian access

Controls can be set up to have the hoist waiting at ground level. So as you approach home simply press the up control and drive in like any other garage.

Close the door behind you and proceed to your basement or mezzanine level without the need to reach outside of your vehicle.

# Control - Multi User System

Controller: Industry Standard Access Controller

	Vehicle Access	Pedestrian Access
Ground Level	 <p><b>RFID 4 BUTTON REMOTE</b> For destination input.</p>	 <p><b>KEYPAD &amp; RFID READER</b> To enable landing control panel.</p>
Onboard	<p>No input required. Destination is pre-programmed.</p>	 <p><b>KEYPAD &amp; RFID READER</b> To enable onboard control panel.</p>
Other Levels	 <p><b>PHOTOELECTRIC SENSOR</b> For automatic return to ground.</p>	 <p><b>CALL BUTTON</b> Where security is not an issue inside the building.</p>

Drivers simply press their destination level, wait for the door to open and proceed onto the platform.

The onboard controls will illuminate to confirm its destination and the occupied lift will automatically proceed to the level and open the level door.

Safetech Multi User controls are web based and provide building administrators with control over access, default levels and help improve cycle times.

## Options

**RFID TAGS/FOBS**

For pedestrian travel. Enables use of onboard controls

# Finishes

## Lifts that match your style

Vehicle lifts shouldn't be dark and industrial. Users should feel like they are riding on any light and bright hotel lift. Safetech offers you quality finishes and custom touches.

### Paint

Standard colour options.  
Custom colours available upon request.

## Walls

### Laminex Fireguard

Wide range of colours and finishes including fire rated options.

### Perforated Mesh

Visually lightweight and durable option, perfect for high traffic multi-user applications.

## Ceilings

### Standard Open Design

Our Standard ceiling option provides users with an open view of the entire lift shaft. Combined with bright LED integrated lighting it eliminates the claustrophobic feeling from regular lift travel.

### Premium Enclosed Mesh with Panelling

For that professional look. Integrated down-lights with 80% egg-crate mesh panelling coverage for ventilation and to give the booth a bright inviting appearance from the outside while feeling open once you are inside the lift.

## Floors

### Aggregate-grit Enamel

**STANDARD FINISH**

Matte paint with non-slip grit in our standard colours.

### Chequerplate

Durable industrial look

### Grid Mesh

32mm Galvanised steel profile, great for wet environments or dirty vehicles  
*(not available on all vehicle lift models).*

# Doors

## Lifts that don't keep you waiting

Contact Safetech for more information and advice on what may suit your needs best.

### DuraFast™

#### High speed roller door

Our DuraFast™ door has been designed from the ground up.

They are faster, quieter and tougher.  
Tested to more than 100,000 cycles

### Sectional Doors

#### Architecturally sensitive designed door panels

Insulated, transparent and ventilated sectional door options available in various colours for all applications.

### Custom Doors

#### 🔧 Nested Roller Doors

- Roof integrated housing to maximise clear door opening

#### 🔧 Sliding Doors

- Hotel personnel lift style doors

#### 🔧 Swing Doors

- For extremely low roof scenarios

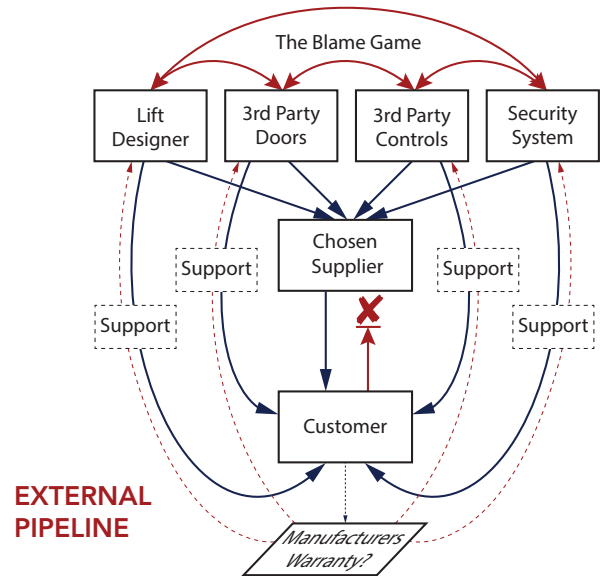

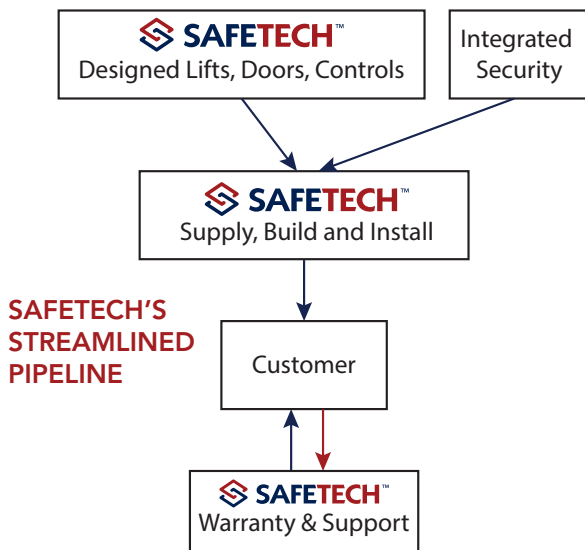

#### 🔧 Personnel Door Interlock

- Recessed lock for secure pedestrian access

# Performance & Reliability

A single trusted supplier that supports you before and after the sale

## What we provide;

- The lift
- Doors
- User controls
- Electrical components
- Security system
- Custom sizes
- A range of booth finishes
- Ongoing servicing
- 24/7 breakdown support
- Emergency assistance
- A suite of optional extras
- & much more

## What we don't do;

- Sell cheap, substandard imports
- Fail to meet Australian Worksafe standards
- Rely on 3rd party suppliers
- Disappear after the sale
- Blame others when issues arise

## Scheduled servicing agreements for peace of mind

- ✓ Safetech will track & schedule when your equipment is due for service
- ✓ A full service history ensures correct diagnosis and management of your product
- ✓ Receive priority attendance to any breakdowns / call outs
- ✓ Receive a 10% Discount on the total of any invoice for a breakdown / call out attendance
- ✓ Intervals to match your usage

Safetech Customer Care provides all of this and more!
